HER DREAM & VISION FOR SWAMI VIVEKANAND SUBHARTI UNIVERSITY

MESSAGE

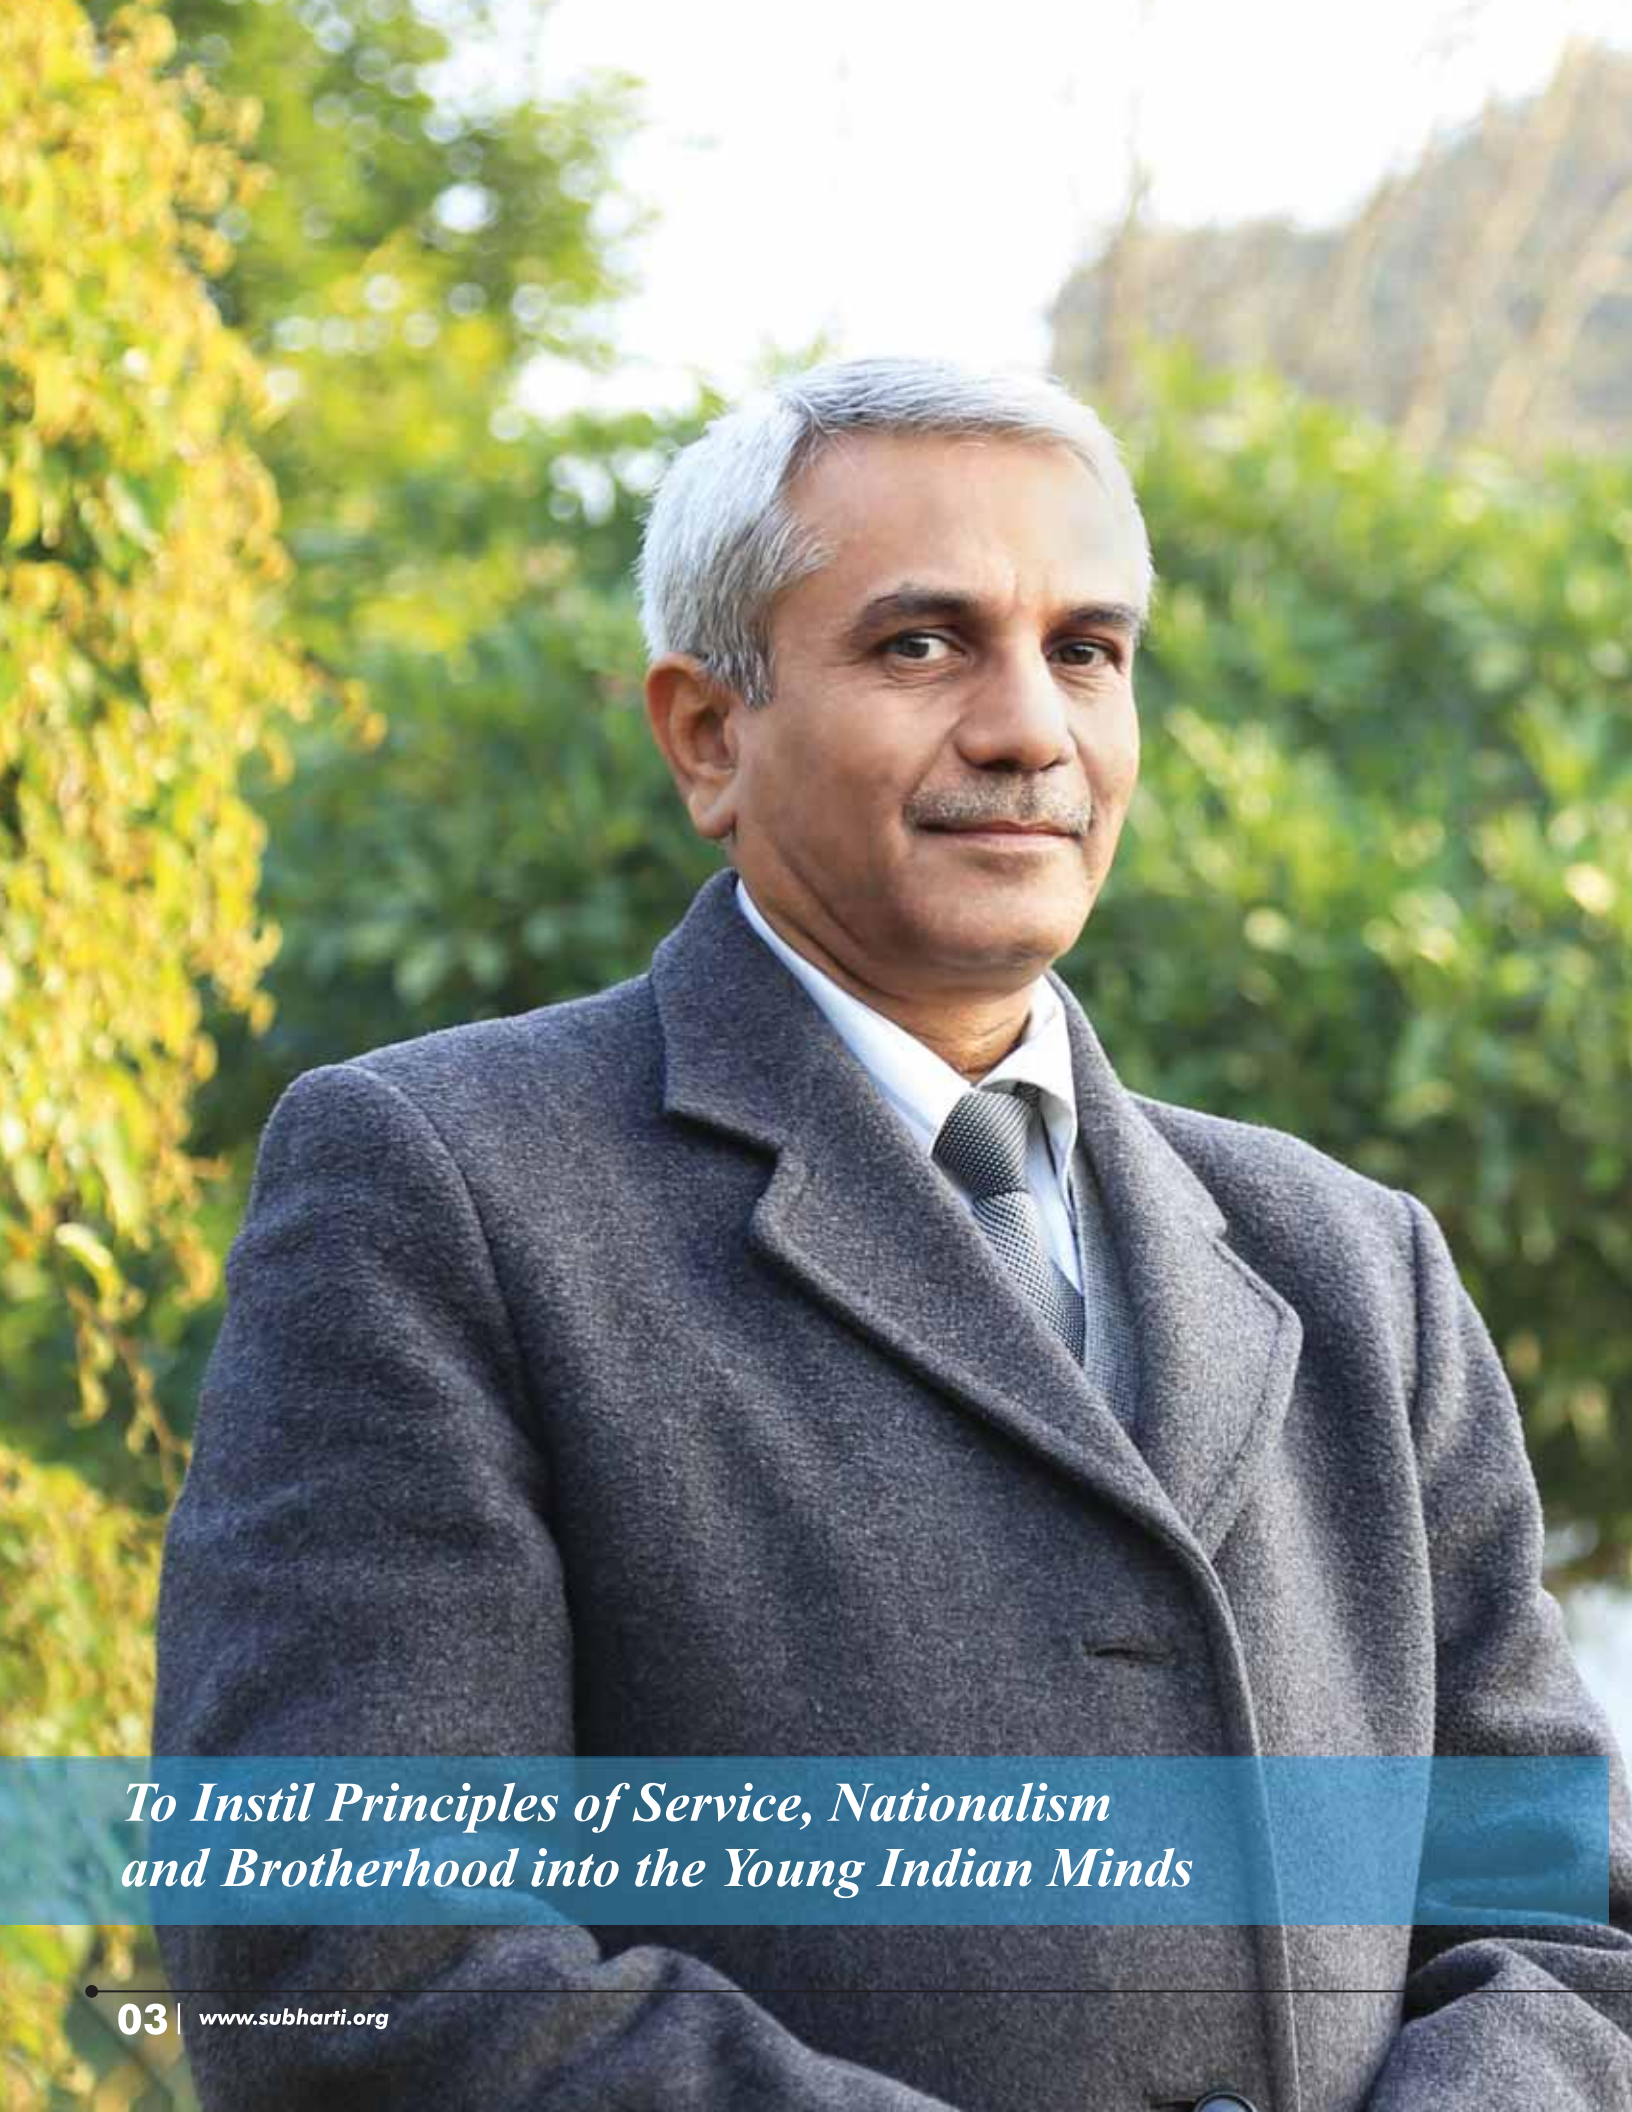

In the pursuit of overcoming the void of insufficiency in the field of medical education, the vision of our founder was to make the University (established in 2008) an exceptional and exquisite learning educational hub, offering a variety of value-based, career-oriented disciplines of technical and professional education, thus engaged in creating highly qualified, academically and technically proficient professionals, who are responsive to the emerging needs of the Nation.

“She believed and inculcated the idea of collectively embarking on the great voyage of the life through experiences of trial and toil, leading to the strengthening of the soul, clearing of the vision, inspiration of the ambition and thus achievement of success. Today “Subharti” has achieved the process of education concerned with overall personality development and sharpening of the inherent capabilities of an individual, by providing an environment, fully conducive to the overall development of students, thus maintaining a balance between academic excellence and moral perfection.

Her longing wish and commitment that 'Subharti University' goes a long way in inspiring and stirring the young minds and soul for bringing out the best within them, which would ultimately turn them out to be “Better than the best” is being fulfilled day in & day out.

As always we believe that she is looking upon us from her heavenly abode and welcoming and inviting students to become an integral part of the “Subharti Family” so that together, we can unitedly shape the destiny of our Nation.”

Dr. Manoj Kapil

Education must bring out the latent potential of the students to the fore. Therefore, the educational institutes have to focus on leveraging knowledge, research and innovation while providing the conducive environment for the same. The entire society rests on the shoulders of these educational institutions where the young minds are being nurtured to serve the nation. The entire education system of India especially the technical institutes have the onus of facilitating overall development of intellectual, ethical, moral and human aspects of the personality of the students.

We at Faculty of Engineering & Technology believe in participative learning, promoting inquisitive spirit, experimentations, research and development rather than drab theoretical teaching and transferring of information. It is rightly said that the child is not vessel to be filled but a lamp to be lit.

Every effort is to make the students connect to their inner being, understand their potentials and shine in this world. We encourage them to become job givers instead of job seekers as this is the need of the hour. We teachers and students together can restore the glory and eminence of our Country when we were acknowledged as the Vishwa Gurus, when the oldest universities of this world Taxila and Nalanda took birth in our Bharat.
